Redio Audio Broadcasting System

Quick Setup & Usage Guide

This system allows you to play background music and scheduled announcements automatically across your store devices.

The system includes three parts:

• **Admin Dashboard –** Manage audio, playlists, devices, and schedules
• **Server (API) –** Connects devices and syncs data
• **Audio Agent –** Software installed on the device that plays audio

---

1. Login to the Dashboard

Open the dashboard in your browser:

https://redio.radhakrishnajewellery.in/login

Email
admin@radhakrishnajewellery.in

Password
admin@#$123

2. Create a Branch

A branch represents a physical store location.

Examples:

• Lucknow Store
• Kanpur Store
• Delhi Store

Steps:

1. Open **Branches**
2. Click **Create Branch**
3. Enter branch name
4. Save

3. Add a Device

A device represents the computer where audio will play.

Steps:

1. Go to **Devices**
2. Click **Create Device**
3. Select the branch
4. Save

The system will generate a **Device Code**.

This code will be used during the agent setup.

4. Install the Audio Agent

Install the **Audio Agent software** on the computer where audio should play.

When the agent starts, it will ask for:

Server URL : https://api.redio.radhakrishnajewellery.in

Device Code

Enter the device code created in the dashboard.

After this step, the device will connect automatically.

5. Upload Audio Tracks

Steps:

1. Open **Tracks**
2. Upload your audio files
3. Save

Supported formats:

• MP3
• WAV

These tracks can now be used in playlists or schedules.

6. Create a Playlist

A playlist is the continuous music that plays in a branch of a store.

Steps:

1. Open **Playlist**
2. Select the branch
3. Add audio tracks
4. Arrange order
5. Save

The playlist will automatically sync to the device.

---

7. Schedule Announcements

Schedules allow audio to play at specific times.

Examples:

• Promotional announcements
• Store offers
• Special messages

Steps:

1. Open **Schedules**
2. Select the branch(All, one, or region wise)
3. Select audio track
4. Choose time
5. Save

When a scheduled audio plays:

• Playlist pauses
• Scheduled audio plays
• Playlist resumes automatically

8. How the System Works

Once the device is connected:

• Playlist plays continuously
• Scheduled audio plays at the selected time
• Everything runs automatically

No manual operation is required.

9. System Links

Admin Dashboard

https://redio.radhakrishnajewellery.in/login

Server URL (for agent setup)

https://api.redio.radhakrishnajewellery.in

10. Device Requirements

The device should have:

• Windows computer
• Internet connection
• Speakers connected

The agent runs in the background and plays audio automatically.

11. Basic Troubleshooting

If audio is not playing:

• Check internet connection
• Make sure the agent is running
• Confirm that playlist is assigned to the branch
• Restart the PC.

Redio Audio System
Automatic in-store audio management for your branches.
